

Steel workshop trolley h1035_17

Steel workshop trolley, 150 kg load capacity, dimensions 75x40x77.5 cm. Three tray shelves for dynamic organization of tools and spare parts.

The **steel workshop trolley h1035_17** is a versatile logistical solution designed to optimize maintenance operations and technical activities in industrial environments. The structure, entirely made of **steel**, is configured to offer robust yet agile support, allowing for the transport of heavy equipment and mechanical components directly to the point of intervention. Thanks to the **three-level** configuration, the operator can segment work tools, improving operational efficiency and reducing downtime due to the search for small parts or tools.

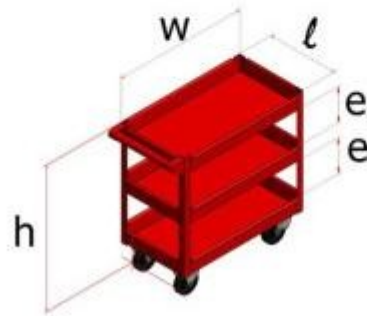

Technical specifications

- **Frame material:** high-resistance steel
- **Maximum load capacity:** 150 kg
- **Configuration:** 3 tray shelves
- **Overall dimensions:** L 75 x D 40 x H 77.5 cm
- **Internal tray dimensions:** 760 x 400 mm
- **Handling system:** 4 wheels with 100 mm diameter
- **Empty weight:** 8 kg
- **Included accessories:** integrated ergonomic push handle
