

Medical step stool for clinics h919_12

Two-step stool for clinics in epoxy steel. Dimensions 50x38x40 cm with non-slip surfaces for safe access to medical couches. The **h919_12 step stool** is a technical furnishing accessory designed to facilitate patient access to examination couches in clinical and hospital settings. The structure is entirely made of **high-resistance steel**, treated with an epoxy finish that guarantees protection against chemical agents and sanitizing detergents. User safety is a priority: each step is equipped with a platform covered in rubber with **non-slip** properties to ensure a firm grip during ascent and descent.

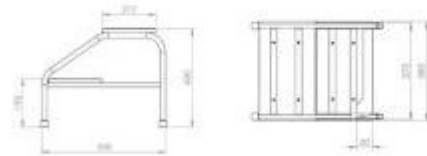

Technical features

- Material: steel with corrosion-resistant epoxy coating
- Configuration: 2 fixed steps
- Overall dimensions: W 50 x D 38 x H 40 cm
- Tread surfaces: high-grip non-slip rubber
- Operating weight: approx. 7.2 kg
