

Step stool for examination couches h573_13

Medical clinic step stool in 18/10 stainless steel with 2 steps, side handle and non-slip base. Adjustable height 470-1150 mm.

Step stool specifically designed for clinics and medical offices, allowing patients to easily access the examination couch while reducing effort and the risk of falls. The **18/10 stainless steel** structure ensures long-term durability and maximum compatibility with healthcare environments, where disinfectants and sanitization procedures are daily routines.

The step stool integrates a **side handle** that facilitates grip and stability during ascent, a critical element for elderly patients, those with reduced mobility, or those in recovery. The **two steps** allow for gradual and safe access, while the **injected non-slip rubber base** offers reliable grip even in damp environments or after cleaning treatments. The legs are finished with **non-slip studs** for stable anchoring to the floor.

Technical features

- Material: Painted **18/10 stainless steel**
- Number of steps: **2**
- Side handle: **Yes**
- Support base: **Injected non-slip rubber, resistant to scratches and disinfectants**
- Leg finishes: **Non-slip studs**
- Dimensions: **W. 485 × D. 470 × H. 470-1150 mm**
