

Step stool for doctor's office h559_21

Single-step stool in grey painted oval tube with non-slip rubber shelf, load capacity 150 kg, for clinics and doctor's offices.

Step stool specifically designed to facilitate patient access to examination couches in outpatient and doctor's office settings. The supporting structure is made of **grey epoxy powder-coated oval tube**, ensuring durability and corrosion resistance. The **shelf is covered with non-slip rubber**, an essential element for user safety during climbing, reducing the risk of slipping even in humid conditions. The simple **single-step** design makes it practical and easy to handle, with remarkable structural stability.

Technical features

- Dimensions: W26 × D45 × H20 cm
- Structure material: grey epoxy powder-coated oval tube
- Shelf: non-slip rubber
- Number of steps: 1
- Maximum load capacity: 150 kg
- Self-weight: 4 kg
- Supply configuration: disassembled
- Classification: class 1 medical device compliant with EEC Directive 93/42
