

Medical step stool for clinics h709_14

Single-step stool in white painted steel for clinics and medical offices. Non-slip platform, dimensions 45x21x25 cm. Facilitated access to the examination table.

Step stool specifically designed for clinics, medical offices, and laboratories, intended to facilitate patient access to the medical table in safe and comfortable conditions. The **white painted steel tube** structure ensures robustness and hygiene, essential characteristics in healthcare environments. The single step is equipped with a **non-slip platform** that significantly reduces the risk of slipping, a critical element in contexts where patients may have reduced mobility or balance difficulties.

Technical features

- Dimensions: L45 x W21 x H25 cm
- Number of steps: 1
- Non-slip platform
- Structure material: white painted steel
