

Step stool for medical offices h573_14

Medical step stool in 18/10 stainless steel with non-slip base. Dimensions 450x450x250 mm. Facilitates access to the examination couch with maximum safety.

The step stool is specifically designed for medical offices and clinics, addressing the need to facilitate patient access to the examination table in optimal safety conditions. The **painted 18/10 stainless steel** structure guarantees resistance to corrosion and durability over time, which is essential in environments where hygiene and frequent sanitization are critical.

The **injected non-slip rubber support base** allows for stable and reliable access, with a surface resistant to scratches and disinfecting agents commonly used in the medical field. The **legs finished with non-slip studs** ensure stability during use, preventing accidental slips.

Technical characteristics

- Material: 18/10 Stainless steel
- Number of steps: 1
- Dimensions: L. 450 × D. 450 × H. 250 mm
- Support base: Injected non-slip rubber
- Finishes: Non-slip studs on the legs
