

Storage sump for liquid containment h874_25

Liquid collection sump capacity 65 liters, without grid, made of 3 mm sheet steel. Dimensions: W 800 x D 500 x h 290 mm.

The **storage sump for liquid containment h874_25** is designed to ensure the safe and reliable management of industrial liquids, such as oils and solvents. Realized in **3 mm thick sheet steel**, this sump offers a **robust and resistant structure**, suitable for multiple applications in the industrial and artisanal sectors.

With a **collection volume of 65 liters**, this sump allows for the containment of any spills, protecting floors and surrounding surfaces from possible contamination. The **height of 100 mm below the loading threshold** facilitates placement and use in limited spaces, while ensuring excellent containment capacity.

The standard finish in **RAL 3000 (bright red)** gives a visible and professional design, but it is possible to request the sump in different RAL colors or with a fully galvanized finish for greater resistance to atmospheric agents, upon evaluation and quotation.

Thanks to its **compact dimensions (W 800 x D 500 x h 290 mm)** and the reduced weight of **25 kg**, the sump is easily positioned and integrated into any work environment, representing an economical and efficient solution for the storage of hazardous or industrial liquids. This version **does not have a grid**.

Ensure a safe and compliant work environment with the **h874_25 storage sump**. Choose a resistant and practical product to meet your specific needs. **Buy now!**

Technical specifications:

- **Dimensions:** W 800 x D 500 x h 290 mm
- **Collection volume:** 65 liters
- **Material:** 3 mm sheet steel
- **Standard color:** RAL 3000 (bright red)
- **Height below loading threshold:** 100 mm
- **Weight:** 25 kg
- **Available customizations:** different RAL colors or galvanization on request and upon quotation

User benefits:

- **Prevention of environmental accidents:** designed to contain accidental spills and protect the surrounding environment.
- **Versatility of use:** suitable for multiple applications in industrial and artisanal fields.
- **Ease of handling:** reduced weight and compact dimensions for easy placement in limited spaces.
- **Guaranteed resistance:** robust steel construction and high-quality surface treatments.

FAQ:

1. What is the collection volume of the sump?

The collection volume is 65 liters, ideal for containing any accidental spills.

2. **Is the sump suitable for containing corrosive liquids?**

Yes, thanks to the sheet steel structure and high-quality painting, the sump is designed to resist a wide range of industrial liquids.

3. **How much height does it occupy below the loading threshold?**

The sump has a height of 100 mm below the loading threshold, ensuring easy access and safe positioning of drums.

4. **What is the weight of the sump?**

The total weight is 25 kg, making it robust and easy to handle.

5. **Is it suitable for outdoor use?**

Yes, it is possible to request the galvanized version for greater resistance to atmospheric agents and corrosion.

Buying guide:

Choosing the **storage sump for liquid containment h874_25** means opting for a practical and resistant solution, designed to ensure safety and efficiency in industrial environments. Thanks to its **3 mm thick sheet steel** construction, this sump offers exceptional durability even under intensive use conditions.

The **65-liter** capacity makes it ideal for containing industrial liquid leaks, protecting surfaces and environments from possible contamination. With compact dimensions and a low weight, it is perfect for workspaces with space constraints.

Before purchasing, consider your specific needs: this sump is a versatile solution. The **h874_25 sump** represents a safe investment for the management of industrial liquids, with the possibility of adapting it to your needs.

Industrial liquid collection sump, liquid container without grid, steel sump for storage, safe containment of oils and solvents, liquid anti-spill sump, industrial steel containers, liquid management solutions, customizable sumps for liquids, galvanized containers, environmental safety in industry, RAL 3000 sump, liquid collection equipment, industrial liquid management, compact liquid container, robust sumps for liquids.
