

## Street furniture planter 85 lt h1003\_20

Rectangular painted steel planter, modular and resistant to external agents. Dimensions: L 57 x D 34 x H 57 cm.

The **85-liter steel street furniture planter H1003\_20** is a professional solution designed to enhance any urban, public, or private outdoor space in a sober and elegant way. With its **essential rectangular shape**, it fits perfectly into modern and classic contexts, becoming a functional design element for **squares, sidewalks, pedestrian areas, entrances to commercial or residential buildings**.

It is made entirely of **galvanized steel** and treated with **thermosetting polyester powder coating**, a treatment that guarantees **high resistance to corrosion, UV rays, and atmospheric agents**, making it suitable for continuous outdoor use without the need for frequent maintenance.

Its structure is **freestanding**, so it does not require anchoring to the ground and can be positioned freely. The weight of 20 kg still provides stability to the planter even in open environments or windy conditions. **Modularity** is one of its strengths: it is possible to place multiple H1003\_20 planters side by side to **delimit areas, create paths, or configure tailor-made green spaces**.

Although supplied **without an inner pot**, it is prepared for the optional insertion of one, making the cultivation and management of **real plants** easier, with the advantage of simplifying irrigation and maintenance operations.

Completely **customizable in colors**, the planter is available in all shades of the **RAL color chart**, for a perfect aesthetic integration in any urban project.

Invest in a durable and elegant solution for street furniture like the **H1003\_20 planter**. Request a personalized quote now for multiple supplies or to receive more details on the available finishes.

### Technical features:

- **Frame material:** galvanized steel and thermosetting polyester powder coated
- **Dimensions:** L 57 x D 34 x H 57 cm
- **Internal capacity:** 85 liters

- **Zero maintenance:** thanks to the protective treatment.
- **Modularity:** allows for tailor-made configurations.
- **Flexibility of use:** with or without an internal pot.

- **Customization:** to adapt to every context.

#### FAQ:

**1. Is the product supplied already assembled?**

Yes, the planter is ready to use and does not require any type of assembly.

**2. Is the planter stable even without fixing?**

Yes, thanks to the weight of 20 kg it is stable without the need for anchoring. It is however freestanding and easily repositionable.

**3. Can I insert an internal pot?**

Certainly. Although not included, the H1003\_20 model is prepared for the insertion of an optional internal pot.

**4. Is it available in other colors besides the standard one?**

Yes, it is possible to request any color from the RAL chart to best suit the urban project.

**5. What kind of maintenance does it require?**

No ordinary maintenance is required. The treatment with thermosetting polyester powder coating guarantees a long life even in outdoor environments.

#### Mini buying guide:

When selecting a **street furniture planter**, it is essential to evaluate the **resistance of the materials**, especially in relation to exposure to atmospheric agents.

The H1003\_20 model is ideal for those looking for a solid and long-lasting solution, thanks to the **galvanization of the steel** and the **special painting** that protects the surface over time.

Another element to consider is **modularity**: if you need to furnish large spaces or configure paths, the product's side-by-side capability allows you to design personalized green areas.

Finally, evaluate the **possibility of customizing colors** to harmonize the planter with the visual identity of your project or urban context.

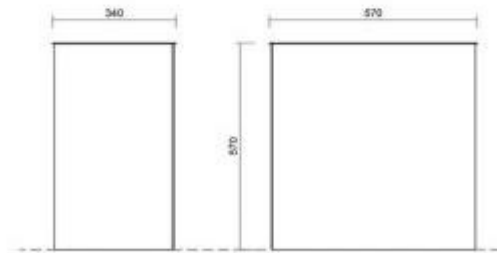

And if you plan to grow live plants, request the **optional inner pot** to facilitate irrigation and replacement of the greenery.
