

Stretcher for patient transport h582_169

Emergency transport stretcher in powder-coated steel. Dimensions: L.212 x D.72 x H.88 cm.

The fixed-height stretcher is one of the indispensable elements for hospitals and medical clinics and allows for the safe transport of patients from one room to another, even in emergency circumstances. The product features a **powder-coated steel structure** and a rack-adjustable backrest up to 70°. At the base, there are **4 wheels of 200 mm, 2 of which with stabilizing brake** and **corner bumpers** to cushion impacts.

It is possible to purchase separately as **optional extras**:

- **Pair of folding side rails** in chrome-plated steel
- **Polyurethane mattress** with removable fire-retardant polyurethane/polyester cover. Dimensions: 195 x 65 x 7 cm
