

Stretcher for veterinary use h930_53

Stretcher with stainless steel top for veterinary use with mattress and non-slip mat. Dimensions: W 142 x D 65 x H 90 cm.

The **H930_53 stretcher** is designed for professional veterinary use in **clinics, surgeries, and veterinary facilities**, offering a robust, practical, and easy-to-sanitize solution for moving and managing animals. Made with an **entirely stainless steel top**, it is ideal for ensuring **strength, hygiene, and durability over time**, even in high-frequency operating environments.

The work surface has a large useful area of **129 x 59 cm**, optimal for examinations, treatments, or light operations. The structure is supported by **four rubber feet** that ensure stability and grip, preventing slipping during use. The fixed height of **90 cm** is designed to offer **ergonomics for the operator**, reducing fatigue during activities.

Included in the equipment, a comfortable and washable **mattress**, supplied in the color shown in the photo, and a **non-slip mat** for maximum safety of the animal on the surface. Its structure has a **maximum load of 250 kg**, also suitable for large animals.

Buy the **H930_53 stretcher** now: the professional choice for veterinary clinics that want efficiency, safety, and quality in their tools. Contact us for multiple supplies.
