

Striped daycare mat h364_84

Striped psychomotor mat for daycare h364_84 with 25 kg/m³ density foam padding and fire-retardant Class 1 SUPERWASHABLE fabric cover. Dimensions: 170 x 100 x 4 cm.

The **striped daycare mat h364_84** is a professional-quality multifunctional padded module, designed specifically for **school managers, daycare and kindergarten employers, kinesiologists, psychomotor therapists, and workplace safety officers in educational or recreational environments**. This device meets the logistical need to set up versatile and safe spaces within educational facilities, solving the operational problem of **creating relaxation zones or ever-new play corners in a few moments, offering a welcoming surface for walking, jumping, and performing floor psychomotor activities, effectively protecting children from accidental bumps or impacts**. The internal structure features a single-block polyurethane foam padding with a calibrated density of 25 kg/m³, excellent for cushioning falls without compromising movement coordination. The external cover is made of special SUPERWASHABLE fabric, a cutting-edge technical material approved in Class 1 for fire reaction, phthalate-free, non-toxic, and antibacterial. The surface, extremely soft and pleasant to the touch, guarantees extraordinary resistance against tears and friction abrasions. To maximize operational functionality, the mat is complete with sturdy fabric handles that facilitate moving and storing the module at the end of the day.

Technical features

- **Product type:** padded striped mat for psychomotricity and relaxation areas
- **Code reference:** h364_84
- **Sectoral intended use:** nursery and early childhood (line identification code: 881)
