

Student desk with aluminum structure h908_86

Single-seater steel desk h908_86 (70x50x59 cm) for primary school. High-stability X-frame and ivory top resistant to intensive use.

The **h908_86 single-seater desk** is a technical furnishing accessory designed for primary school classrooms, where stability and mechanical resistance are fundamental requirements. The design focus of this model is the **X-frame**, an engineering configuration that guarantees optimal distribution of static and dynamic loads, eliminating the transversal oscillations typical of traditional desks subjected to continuous stress.

Ergonomics are calibrated to the morphology of younger students: the fixed height of **59 cm** promotes a natural posture of the spine, reducing fatigue during prolonged writing and reading sessions. The selected materials, from structural steel to the high-density top, ensure a long life cycle even in contexts of frequent cleaning with sanitizing detergents.

Technical features

- **Top dimensions:** W 70 x D 50 cm
- **Total height:** 59 cm (specific for primary school)
- **Frame:** X-structure in steel tube with an increased diameter of 40 mm
- **Frame finish:** Aluminum-colored epoxy powder coating, anti-corrosion
- **Worktop:** Scratch-resistant surface in ivory shade
- **Components:** Scratch-resistant end feet for floor protection
