

Sump pallet for drums h977_03

UV-stabilized polyethylene spill pallet for storing 4 x 200L drums. Capacity 550L, stackable and forkable monobloc structure. The **sump pallet for drums h977_03** is a professional safety device designed for the storage and management of **hazardous chemicals**. Designed to prevent accidental spills in industrial environments, this pallet actively protects the soil and groundwater, ensuring full compliance with environmental regulations. Its containment capacity of **550 liters** makes it suitable for securing **4 x 200-liter drums**.

Manufactured through a **rotational molding** process in 100% virgin polyethylene, the structure is a monobloc without joints or welds, eliminating any risk of structural leakage at the root. The material is UV-stabilized, allowing use both indoors and in outdoor areas exposed to atmospheric agents, maintaining **resistance to oils, acids, and bases** unchanged.

Technical characteristics

- **Material:** 100% UV-stabilized virgin polyethylene
- **Containment capacity:** 550 liters
- **Dimensions:** L 142 × W 142 × H 52 cm
- **Weight:** 42 kg
- **Maximum load:** 1000 kg (uniformly distributed)
- **Color:** Green
- **Chemical resistance:** Excellent against acids, bases, and oils
- **Handling:** Forkable for pallet truck or forklift (exclusively when empty)
- **Stackability:** Stackable up to 5-6 pieces for logistical optimization
