

RAL 7005

Sump tray for drums with perforated tool panel h874_33

Liquid containment and industrial storage tray, with a capacity for 2 x 60-liter drums. Equipped with a perforated tool wall and wheels. Dimensions: 570 x 890 x h 1685 mm.

The **h874_33 drum sump tray** is a practical and efficient solution for the collection and containment of industrial liquids. Ideal for the safe filling and storage of **2 x 60-liter drums**, it is designed to meet the needs of mobility and organization in industrial and production environments.

The **sump tray** is constructed from **3 mm steel sheet**, offering superior strength and durability over time, even in demanding operational conditions. The tray is equipped with a **high-capacity galvanized grating**, capable of supporting up to **1000 kg/m²**, ensuring safety and stability during loading and unloading operations.

Enhanced by a **galvanized steel wall with 10 mm square holes**, arranged on a regular 38 mm grid, which allows for the customized positioning of tools and accessories (not included). This system improves operational efficiency and allows you to keep everything you need at hand.

Thanks to a handling system composed of **2 swivel wheels (one with brake)** and **2 fixed polyamide wheels** with a diameter of **100 mm**, the tray ensures smooth and safe portability. The **hot-dip galvanized push handles** further improve maneuverability, making it suitable for dynamic environments.

The **collection capacity of the tray** is **60 liters**, a value that guarantees excellent protection from any spills or liquid leaks. The **RAL 7005** finish offers a professional aesthetic and superior resistance, but other RAL colors or a galvanized model are available upon request, subject to a quote.

Make your industrial operations safer and more efficient with the **h874_33 sump tray**. Designed for maximum **practicality and**

safety, it is an essential investment for your work environment. **Order it today!**

Technical features:

- **Dimensions:** 570 x 890 x h 1685 mm
- **Collection volume:** 60 liters
- **Weight:** 64 kg
- **Maximum capacity:** 2 x 60-liter drums
- **Tray material:** 3 mm steel sheet
- **Galvanized grating:** capacity 1000 kg/m²
- **Perforated wall:** aluminum with 10 mm square holes in a continuous 38 mm grid for the free positioning of tool holders
- **Wheels:** 4 polyamide wheels Ø 100 mm (2 fixed, 2 swivel of which 1 with brake)
- **Push handles:** hot-dip galvanized
- **Standard color:** RAL 7005

User benefits:

- **Safe storage:** allows the management of two 60-liter drums in a stable and safe manner.
- **Functional organization:** perforated wall ideal for keeping tools and accessories always at hand.
- **Easy handling:** robust wheels and ergonomic handles for easy transport.
- **High resistance:** high-quality materials and anti-corrosion treatments for long-term use.
- **Versatility of use:** suitable for multiple applications in industrial and logistics sectors.

FAQ:

1. **How many drums can the tray hold?**
It can accommodate up to 2 x 60-liter drums in a vertical position, ensuring safety and practicality.
2. **How is the product's mobility guaranteed?**
The tray is equipped with a polyamide wheel system, with 2 fixed and 2 swivel (one with brake), and hot-dip galvanized push handles for simple handling.
3. **What are the dimensions of the perforated wall?**
The galvanized steel wall features 10 mm square perforations, distributed in a continuous 38 mm grid.
4. **Is it suitable to withstand demanding working conditions?**
Yes, thanks to the 3 mm thick steel structure and the galvanization of the grating and tool wall, the tray resists wear, chemical agents, and intense industrial environments.
5. **What is the maximum weight supported by the tray?**
The tray, thanks to the high-capacity galvanized grating, can support a maximum load of **1000 kg/m²**, ensuring stability and safety even with high loads.

Buying guide:

Buying the **h874_33 liquid collection tray** means choosing a professional and versatile product, designed to optimize the **safety** and **efficiency** of industrial operations. With a robust steel structure and a practical and functional tool wall, this tray is perfect for managing oils and liquids in complex production environments.

Thanks to the **compact design** and the **integrated handling system**, it is ideal for dynamic spaces and operations requiring mobility. The resistance to high loads and protection against corrosion make it a durable and reliable choice for your daily work. Don't miss the opportunity to improve your productivity with this indispensable tool.

Liquid collection tray, industrial drum storage, oil and solvent management, mobile container with wheels, galvanized drum sump tray, perforated wall for tools, industrial anti-leak equipment, hazardous liquid container, galvanized grating for drums, steel storage solutions, resistant containers for industrial liquids, anti-corrosion tray with wheels, support for 60-liter drums, industrial safety equipment, customizable trays for liquid storage.
