Supine standing table h731_36

Electric tilt test table in 4 segments, tilt up to 90°, max load 180 kg, fireproof upholstery, handset control.

The tilt test table is a medical device designed for medical offices and clinics specialized in cardiology and neurology. It allows for the gradual diagnostic examination of the patient in a supine position, with a controlled transition towards a vertical position, to evaluate cardiovascular response and symptoms of instability, imbalance, or syncopal episodes.

The structure is composed of **4 padded segments**, each 60 cm wide, upholstered in **fireproof synthetic leather** certified Class 1 IM. The lateral padding with rounded edges and 4 cm thickness (density 30 kg/m³) ensures comfort and safety. The **electric tilt** is regulated by an **ergonomic handset with an applicable magnet**, powered by 220 V 50/60 Hz mains. The **tilt indicator in degrees** allows for precise control of the angle up to 90°.

The support base is a **single footplate not adjustable in tilt**, adjustable only in the length of the bed. Four wheels (diameter 12.5 cm), one of which is directional, are equipped with a **braking system on each single wheel**.

Technical features

- Number of sections: 4
- Safe maximum load: 180 kg
- Maximum tilt: 90°
- Power supply: 220 V 50-60 Hz mains
- Control: ergonomic handset with magnet
- Tilt indicator: in degrees, standard
- Footplate: single, adjustable only in length
- Table dimensions: depth 60 cm × height from ground 56 cm

- Length without footplate: 174 cm
- Length with footplate: min. 182 cm, max. 203 cm
- Maximum patient height: 205 cm (supine position)
- Upholstery: fireproof synthetic leather, Class 1 IM
- Padding: lateral with rounded edges, 4 cm thickness, 30 kg/m³ density
- Wheels: diameter 12.5 cm, 1 directional, brake on each wheel
- Total weight: 65 kg
- Certifications: Declaration of conformity included
- Upholstery: available in various colors
