

Revolving tv stand in tempered glass h12506

Swivelling frosted toughened glass for lcd tv, plasma, LED up to 50. "Max 65 kg

Swivel stand tempered glass with elegant design, compact and innovative. Suitable for plasma, lcd and led up to a maximum of 50 "and comes with brushed aluminum feet that makes it stable and secure.

The tempered glass is achieved through a particular said hardening heat treatment, which allows increase of up to four to five times the characteristics of mechanical strength and thermal shock resistance. Thanks to the heat treatment, instead of breaking in a few pieces sharp and dangerous as glass, tempered glass shatters into many small fragments not sharp.

Specifications:

- material: frosted toughened glass
