

Surgical scrub sink h1013_02

2-station sink in AISI 304 stainless steel, soundproofed bowl and rounded edges. Dimensions: W 140 x D 55 x H 97.2 cm.

The **H1013_02 stainless steel hospital sink** is a **2-station surgical scrub sink**, designed for high-intensity healthcare environments such as operating rooms, surgical departments and clinics.

It is **made entirely of AISI 304 stainless steel**, a highly hygienic material, resistant to corrosion and suitable for use in medical contexts where frequent sanitization is essential. The sink is set up for fixing to a **load-bearing wall**. In the presence of plasterboard walls and/or similar, please request the **special fixing kit** which will be provided separately. Supplied: **drain, wall mounting support** and **flexible connection** for the **water connection**.

The **bowl is soundproofed** and equipped with **anti-splash shaping**, which limits water dispersion during use, improving the cleanliness of the surrounding area. The **rounded edges** eliminate sharp corners and facilitate thorough cleaning, preventing the accumulation of dirt.

The model is also equipped with an **anti-drumming application**, which reduces the noise of the water flow, helping to maintain a quieter and more comfortable environment within hospital facilities.

The sink is supplied in a **monobloc structure** to be wall-mounted. The **product dimensions are 1400 x 550 x 972 mm (W x D x H)**.
