

Swimming pool and wellness fountain h992_04

Extended fountain for swimming pools and wellness in polished AISI 316-L stainless steel. Dimensions: D 59 x W 35 x H 48 cm.

The **H992_04 extended waterfall fountain** is a decorative and functional element designed to enrich **swimming pools and wellness environments** with an elegant and relaxing touch. The structure in **polished AISI 316-L stainless steel** makes it particularly **corrosion-resistant** and ideal for installation in both **indoor and outdoor environments**, even in the presence of chlorine and high humidity.

Its extended shape allows for a **wide and regular water flow**, creating a **35 cm wide blade** that enhances the space and provides an extremely pleasant visual and sound effect. The water flows uniformly, producing a **continuous waterfall perfect for moments of relaxation** and well-being.

This fountain can be **easily installed on the pool edge** without the need for fixed anchors, making installation quick and versatile. The **1 1/2" female fitting** allows for direct connection to the pool system, with an **ideal flow rate of 20 m³/h**. The use of a **0.75 kW pump** is recommended to achieve the best possible effect.

With dimensions of **59 cm depth, 35 cm blade width, and 48 cm height**, the H992_04 fountain stands out for its scenic presence without being bulky.

Add elegance and relaxation to your **pool with the H992_04 fountain**. Contact us now for a tailor-made offer for residential or professional projects.

FAQ:

1. **What is the difference compared to the Mini Bali?**

The H992_04 has a greater depth (59 cm), which allows for a more extended water jet.

2. **Does it need to be anchored to the ground?**

No, the fountain is designed to be installed without fixed anchors.

3. **Is it suitable for indoor pools?**

Yes, thanks to the AISI 316-L stainless steel, it is also ideal for enclosed and humid environments.

4. **What type of pump is needed?**

A 0.75 kW pump is sufficient to ensure a flow rate of 20 m³/h.

5. **Can it also be used in spas or wellness centers?**

Absolutely yes, it is perfect for wellness and relaxing environments.

Mini buyer's guide:

The choice of a **waterfall fountain for humid environments** must take into account the **resistance of materials**, the **water flow rate**, the **aesthetics**, and the **ease of installation**.

The H992_04 model offers an ideal balance between functionality and design, with a **35 cm blade**, **simple installation**, and **professional material**.

It is a perfect solution for those who desire **an exclusive and relaxing touch** in their pool or wellness area.
