

Swimming pool lane 25 m h1009_03

25-meter lane for h1009_03 swimming pools with Ø85 mm PP anti-turbulence disks and Ø6 mm plastic-coated AISI316 stainless steel cable. Space-saving for training.

The **h1009_03 swimming pool lane** with a length of 25 meters is swimming facility equipment designed specifically for training sessions in 25-meter pools. This product solves the operational problem of managing wave motion during intense swimming and limited equipment storage space, thanks to a hydrodynamic shape that reduces turbulence and small-diameter disks that facilitate storage and transport. Intended for sports facility managers, pool managers, and swimming clubs, the lane consists of Ø 85 mm high-quality polypropylene (PP) disks treated with additives to resist chemical and atmospheric agents, mounted on a Ø 6 mm plastic-coated AISI316 stainless steel cable. The structure includes high-density polyethylene (PE-HD) floating balls and is supplied as standard in blue, red, and white, with additional colors available upon request.

Technical features

- **Type and use:** Swimming pool lane suitable for training
- **Length:** 25 meters
- **Disk material:** High-quality polypropylene (PP) with additives resistant to chemical and atmospheric agents
- **Disk dimensions and density:** Ø 85 mm (14 disks per meter)
- **Disk function:** Designed to reduce turbulence
- **Assembly support:** Plastic-coated AISI316 stainless steel cable, Ø 6 mm
- **Floats:** PE-HD floating balls (7 per meter)
- **Standard colors:** Blue, red, white
- **Color variants:** Other colors available on request and subject to quote
- **Physical properties:** Reduced disk diameter to facilitate storage and transport
- **Stainless steel springs and tensioners:** (on request and subject to quote)
