

Swing for adults and children h763_15

Professional glue-laminated wood swing with flat seat and inclusive double seat, ideal for public playgrounds and certified recreational areas.

The **h763_15** swing is a professional play structure designed to ensure fun and safety in high-traffic public and private contexts. Featuring a robust frame in **pressure-treated glue-laminated wood**, this swing stands out for its mixed seat configuration. The presence of a **face-to-face double seat** (consisting of a cradle seat for the little ones and a flat seat for the companion) promotes visual interaction and direct contact between adult and child during swinging, making the play experience safer and more engaging.

Technical characteristics

- **Structure materials:** Pine glue-laminated wood pressure-treated to resist atmospheric agents.
- **Metal components:** Galvanized steel brackets and joints, narrow-mesh stainless steel chains.
- **Seat configuration:** 1 standard flat seat and 1 double seat (1 safety cradle seat + 1 flat seat).
- **Construction details:** Finishing elements in high-density polyethylene (HDPE).
- **Overall dimensions:** L 4.35 x W 1.83 x h 2.77 m.
- **Free fall height (HIC):** 1.86 m.
- **Minimum installation space:** 7.83 x 7.35 m (impact surface 22.66 m²).
- **Certification:** Product compliant with European Standards EN 1176 tested by the TÜV SÜD Institute.
