

## Swing for public gardens h749\_18

Two-seater swing h749\_18 for children aged 1-6 years. Aluminum and galvanized steel structure with reduced height for maximum safety in schools and parks.

The **h749\_18 two-seater swing** is a play equipment designed specifically for early childhood, ideal for contexts where safety and accessibility are a priority. Its distinctive feature is the **reduced height**, designed to facilitate the approach to play for the youngest children and ensure optimal management of play spaces in nurseries and kindergartens. The structure combines **aluminum uprights** and a **galvanized steel crossbar**, offering excellent resistance to atmospheric agents and long-lasting mechanical stability.

## Technical features

- Overall dimensions: L 349 x D 159 x h 164 cm
- Upright structure: Extruded aluminum
- Crossbar: Hot-dip galvanized steel
- Suspension systems: Narrow-link stainless steel chains
- Seats: 2 flat seats with internal aluminum core and external anti-trauma rubber coating
- Decorative components: 19 mm two-tone HDPE (high-density polyethylene) panels
- Recommended age of use: 1-6 years
- Free fall height (FFH): less than 100 cm
- Capacity: 2 seats
- Safety area: 16 sqm
