

Table tennis table for recreational spaces h949_03

H949_03 table tennis table in HPL and galvanized steel (274x152.5 cm). Vandal-proof and inclusive structure, ideal for parks, schools and outdoor urban areas.

The **h949_03 table tennis table** is a professional gaming system designed for fixed installations in high-traffic outdoor environments. The structure is engineered to meet the needs of **public parks, educational institutions, sports clubs and urban recreational areas**, guaranteeing total protection against **vandalism** and **extreme weathering agents**, including saline and marine contexts.

The playing surface is made of **8 mm high-pressure laminate (HPL)**, a material characterized by a superior density that prevents deformations caused by thermal shocks, UV rays and frost. The surface is further stiffened by a **60 mm galvanized steel** perimeter frame, a configuration that ensures a uniform ball elastic response compliant with gaming standards. User safety is increased by **beveled edges** and rounded corners, which reduce the risk of trauma from accidental impact.

The base consists of legs in **square-section galvanized tubular steel (80 mm)**, equipped with 10 mm anchoring plates for permanent fixing on concrete bases. The design is studied for **inclusive accessibility**, allowing easy use even for people with reduced mobility.

Technical features

- **Playing surface:** 8 mm thick high-pressure laminate (HPL) with 60 mm galvanized steel reinforcement
- **Supporting structure:** Galvanized steel legs with 80 mm square tubes
- **Anchoring system:** 10 mm base plates with expansion bolts included
- **Net:** Solid steel in 2 mm perforated sheet metal, treated with galvanization and epoxy-polyester paint
- **Regulatory dimensions:** 274 x 152.5 x 76 cm
- **Net height:** 127 mm
- **Total weight:** approx. 50 kg
- **Bounce performance:** 230 mm from a 300 mm fall (standard compliant)
- **Safety:** Rounded edges and curved net corners
