

Tank for waste oil collection h626_03

Container for waste oil storage. Capacity: 1200 lt. Dimensions: Ø140 x H150 cm.

Waste oil recovery container, essential for the correct disposal of oil in order to avoid damage to humans and the environment. Constructed both internally and externally in **recyclable polyethylene** and equipped with an **airtight lid**. The oil is poured inside via the upper airtight hatch and the filter drain. To monitor the quantity inserted, there is a **level indicator** in the upper part.

Technical features:

- Dimensions: Ø140 x H150 cm
- Material: 100% recyclable polyethylene
- Capacity: 1200 lt
- Removable filter drain
- Airtight lid
- Airtight hatch lock for oil loading and unloading
- Color: black (used for mineral oil collection)

**Other colors for collecting other types of oils are also available upon request and subject to a quote: green (vegetable oil), red (dielectric oil), orange (brake oil), yellow (oily emulsions), light blue (antifreeze), gray (hydraulic oil).*
