

Task chair in chrome-plated steel and black mesh h865_08

Single-shell task chair in chrome-plated steel. Black self-supporting mesh. Dimensions: W. 45 x D. 70 x h. 102-112 cm.

Among the most important elements to choose when setting up office environments are **task chairs**, which allow for activities to be carried out in total comfort and safety. This model features a **chrome-plated steel single-shell structure** with **chrome die-cast aluminium armrests**. The **seat and the backrest** consist of a chrome-plated tubular single-shell, inside which a **black self-supporting PVC mesh** is inserted via 2 steel tie-rods, with very high heat-sealed resistance to ensure greater durability over time. The **base** of the chair is made of **Ø 670 mm aluminium** with **Ø 60 mm black nylon wheels**. The chair is equipped with a **single-lever tilting mechanism, with gas height control and locking in the operating position**. The mechanism is complete with a handwheel for adjusting the tilting tension.

Technical features:

- Dimensions: W. 45 x D. 70 x h. 102-112 cm
