

## Telematic teacher's desk h491\_03

Telematic desk with metal structure and anti-scratch melamine top, integrated cable management. Dimensions: L 160 x D 70 x H 70 - 74 cm.

The **H491\_03 telematic teacher's desk** is designed to meet **ministerial requirements** in terms of **stability, robustness and functionality**, making it ideal for **classrooms, multimedia laboratories and training institutes**.

The structure is made of **metal with 40x40 mm square section legs** and **height-adjustable terminals (from 70 to 74 cm)**, to ensure **maximum stability** on any surface. The design is enriched by **modesty panels** on three sides, with a **sheet metal front and oak melamine sides with ABS edging**, offering a perfect balance between aesthetics and protection.

The **anti-scratch melamine worktop with oak grain** has a **thickness of 38 mm** and includes **rounded ABS edges** for greater safety. It is equipped with **cable holes** and a **perimeter metal support**, facilitating the management of electronic devices.

For greater efficiency, the **cable management system is integrated both on the worktop and in the lower part**, allowing the connection of **rigid or flexible electrical conduits**. Furthermore, the **pocket channeling** allows for **housing power strips and power supplies**, optimizing space and keeping the cables of portable devices and connections tidy.

Thanks to its modern and functional design, the H491\_03 desk represents a perfect solution for **digitalized school and educational environments**.

Buy the **H491\_03 telematic desk** now to ensure a modern, safe and efficient teaching environment! Request a personalized quote immediately.
