

Telescopic ladder for professional use h858_13

Professional telescopic ladder in anodized aluminum, height 4.4m and capacity 150kg. Compact folding structure EN 131 certified.

This **professional telescopic ladder** in **anodized aluminum** represents a cutting-edge technical solution for those requiring versatility and maximum space saving. Designed to facilitate maintenance and installation operations in professional contexts, the ladder solves the problem of transporting bulky equipment thanks to its **folding** system that drastically reduces its volume when closed. The anodizing treatment not only protects the material from wear, but also ensures clean handling, making it ideal for work in indoor environments or offices.

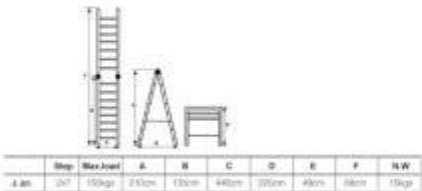

Technical features

- **Material:** High-resistance anodized aluminum
- **Maximum capacity:** 150 kg
- **Step configuration:** 2 x 7 steps
- **Safety:** Steps with special non-slip surface
- **Locking system:** Integrated locking mechanism
- **Dimensions when closed:** 92 x 47 x 19 cm
- **Maximum extended height:** 4.4 meters
- **Compliance:** Produced according to EN 131 safety standards
