

Telescopic ladder h858_02

Professional anodized aluminum telescopic ladder, 5 meters. 150 kg load capacity, EN 131 certified, compact for transport and storage.

This **professional telescopic ladder** is designed for operators who require versatile, safe, and easily transportable equipment. The structure is made of **anodized aluminum**, a treatment that not only protects the metal from corrosion and wear, but also prevents the release of dark residue on the user's hands. The extension system is supported by an integrated **locking mechanism** that ensures maximum structural rigidity and stability during use, eliminating unwanted wobbling.

Technical features

- **Material:** high-resistance anodized aluminum
- **Maximum height:** 5 meters
- **Step configuration:** 2 x 8 with ribbed anti-slip surface
- **Maximum capacity:** 150 kg
- **Dimensions in closed position:** 94 x 47 x 21 cm
- **Certification:** compliant with European standard EN 131
- **Safety:** quick and secure locking mechanism
