

## Telescopic ladder h858\_16

Professional telescopic ladder in anodized aluminum, height 4.4m, 15 non-slip steps, load capacity 150kg, EN 131 certified and ultra-compact.

This **professional telescopic ladder** represents an advanced solution for operators needing versatile landing and maintenance equipment, capable of combining a significant operational height with a minimal footprint during transport. Made of **anodized aluminum**, the structure prevents oxidation and ensures clean handling, making it ideal for technical and professional indoor and outdoor contexts. The quick extraction system allows reaching **4.4 meters** of extension in a few seconds, offering rigid and secure support certified according to the strictest European standards.

## Technical features

- **Material:** High quality anodized aluminum
- **Number of steps:** 15 steps with special non-slip surface
- **Maximum load:** 150 kg
- **Maximum extended height:** 4.4 meters
- **Folded dimensions (closed):** 96 x 48 x 9 cm
- **Safety:** Product compliant with EN 131 safety standards
- **Portability:** Compact design for storage in small vehicles
