

Telescopic ladder h858_19

Professional telescopic ladder in anodized aluminum, 13 non-slip rungs, height 3.8m. Compact and EN 131 certified for capacities up to 150kg.

This **professional telescopic ladder** is designed for operators who need safe access at high altitudes without sacrificing maximum portability. The **anodized aluminum** structure guarantees high mechanical resistance and prevents surface oxidation, preventing the user's hands from getting dirty during handling. Thanks to the graduated extension system, the ladder reaches a height of 3.8 meters, but can be closed into extremely compact dimensions (85 cm), facilitating transport in compact vehicles and storage in confined spaces.

Technical features

- **Material:** high quality anodized aluminum
- **Number of rungs:** 13 with non-slip surface
- **Maximum extended height:** 3.8 meters
- **Maximum capacity:** 150 kg
- **Closed dimensions:** 85 x 47 x 9 cm
- **Safety standards:** EN 131 compliance
- **Portability:** ultra-compact and lightweight design
