

Telescopic work ladder h853_10

Professional aluminum telescopic ladder 8+8 steps, equipped with adjustable levelers and foldable stabilizers for heavy-duty use.

This **telescopic work ladder** has been designed to meet the needs of maintenance technicians and installers operating in intensive professional contexts. Made of **high-quality aluminum**, the structure integrates a pressed aluminum leaf hinge that ensures mechanical solidity and smoothness in configuration changes. Thanks to the telescopic leg system and integrated levelers, the device solves the critical issues related to positioning on irregular surfaces or architectural differences in level, always ensuring a flat and safe working condition.

Technical specifications

- **Material:** High-strength aluminum
- **Step configuration:** 8+8 rungs system
- **Safety:** Knurled rungs with anti-slip properties
- **Stability:** Two foldable base stabilizers for a reduced footprint
- **Leveling:** Two independent levelers for use on slopes or steps
- **Handling:** Two non-marking wheels specifically for quick transport
- **Components:** Pressed aluminum leaf hinge

Included accessories:

- Attachable tool bag
