

Patient transfer sheet h664_14

Transfer sheet for injured persons. Dimensions: 180 x 50 cm. Max capacity: 350 kg. Material: polyethylene, latex free.

Transfer sheet for emergency and rescue operations for the injured and for their transfer in ambulances or on stretchers. Consisting of a **robust and stable polyethylene structure**, with a **nylon cover sheet** that ensures maximum smoothness and hygiene as it is antibacterial and easy to clean. The absence of any magnetic parts also makes it **radiolucent**; additionally it is also **foldable** to facilitate transport and reduce its footprint.

Technical features:

- Dimensions: 180 x 50 cm
- Max capacity: 350 kg
- Material: polyethylene, latex free
- Antibacterial and easy-to-clean nylon cover
- Radiolucent
- Foldable
