

Sliding transfer sheet h13676

Sliding transfer sheet for patients made of high-glide material. Available in different sizes. Washing: max 40°.

Transfer sheet made entirely of **high-glide material**, while the external surface ensures grip with the user's body.

Can be used to perform movements on the bed (horizontally or vertically) or to "turn on side" both in the presence of an assistant, reducing the load on the upper limbs and back, or, depending on the person's motor skills, independently.

In addition, the sheet also allows for **moving the bedridden patient** between two different surfaces placed at the same height (for example, between a bed and a shower stretcher).

The **sliding transfer sheet h13676** is available in the following sizes:

- Small- **Length 100 cm**
- Medium- **Length 140 cm**
- Large- **Length 190 cm**

Technical features:

- Material: high-glide
- Width: 85 cm
- Washing: max 40°

INFORMATION

- **warranty** 1 anno
- **Width** 85 cm
