

Therapy chair with folding armrests h448_79

Blood donation chair in steel with folding armrests and reclining backrest. Dimensions: W.65 x D.75 x H.105 cm.

The **steel blood collection chair with epoxy coating** is ideal for **diagnostic centers and healthcare facilities** where blood samples are frequently taken. The product is also suitable for blood collection centers for humanitarian purposes. The chair features a **steel structure with epoxy coating** with a gas-operated reclining backrest 85°. On both sides of the chair, there is a **folding armrest** thanks to which the patient can wait comfortably for the collection procedure to finish. The upholstery is made of **30 kg/m3 high-density foam rubber** with an **M2 fire-retardant synthetic leather** cover. The two 50 mm diameter rear pivoting wheels allow the chair to be moved easily from one place to another.
