

Three-panel medical screen h567_17

3-element clinical screen with wheels, polished aluminum frame, washable white fire-retardant panels, foldable, 150x170 cm.

The clinical screen is a mobile solution for managing space and privacy in healthcare settings. Made with a **polished aluminum round tube frame**, it guarantees structural lightness and ease of movement. Composed of **three panels 50 cm wide** each, connected by **grey nylon hinges**, the screen allows for a flexible configuration of the clinical space. The **washable white fire-retardant curtains** ensure hygiene and compliance with fire regulations, essential in medical environments. The ability to **fold in on itself** makes it easy to transport and store, reducing the footprint when not in use.

Designed for medical offices, clinics, emergency rooms, hospitals, and private practices, the screen solves the problem of privacy during visits while maintaining operational versatility.
