

## Tibetan bridge walkway for playground h575\_43

Mobile bridge in glulam nordic pine with galvanized steel chains. Supporting structure 90x90 mm, oscillating elements 70x70 mm. For children aged 5-11 years, safety area 647x400 cm.

The mobile bridge in glulam nordic pine is a play structure designed to enrich urban areas and green spaces dedicated to childhood. It promotes outdoor activity and stimulates imagination through the suspended passage, encouraging the use of fantasy and conscious movement.

The design prioritizes **stability and safety**, essential characteristics for children's play in public and private spaces.
