

Tilting bin for public spaces h763_38

Outdoor wooden tilting bin treated in class IV autoclave, capacity 50 L. Double-leg structure 104.5 cm high and 35 cm round basket.

The **tilting bin for public spaces** is a solution designed to preserve urban decorum and keep common areas clean, tidy, and welcoming. This element solves the need for efficient waste management in natural and urban contexts through a **durable and functional** structure that does not compromise the aesthetics of the landscape. Made of **solid wood and laminated wood** treated in a class IV autoclave, the bin guarantees high biological resistance, offering a practical and robust support ideal for intensive daily use.
