

Tipping skip for forklift h286_52

500-liter reinforced steel tipping skip for forklifts, with a watertight tank and Vulkolan wheels for safe waste management.

The **h286_52 tipping skip** represents a professional solution for optimizing disposal flows in workshops, metalworking industries, and construction sites. Designed for the **recovery and transport of production waste**, this equipment solves the problem of handling heavy materials or liquid residues, ensuring maximum cleanliness of the work environment.

The structure is made of **steel reinforced with structural tubes and high-thickness sheets**, treated with Blue RAL 5015 protective painting to withstand intensive work cycles and atmospheric agents. The integration of a **watertight welded tank** also makes it suitable for containing oily components or waste liquids, preventing accidental leaks during transit.

Technical specifications

- **Load capacity:** 500 liters
- **Maximum load:** 1000 kg
- **Construction material:** Steel reinforced with structural tubes and structural sheets
- **Discharge system:** Full 160° rotation via fork pockets with terminal joint
- **Operational safety:** Double locking hook and anti-shock rubber buffers
- **Manual handling:** 2 fixed wheels and 2 swivel wheels in Vulkolan with ball bearings
- **Compatibility:** Designed for lifting with a forklift or reach truck
- **Overall dimensions:** W 98 x D 140 x H 92.5 + 20 cm
- **Finish:** Industrial Blue RAL 5015 painting
