

Professional conveyor toaster h2302

Professional conveyor toaster ideal for hotels. Rear bread slice exit. Hourly production: approximately 600 slices.

Perfect toaster for hotels with extra-long loading area; the advanced technology allows for precise adjustment of the browning level of the bread slices. The wide opening allows for easy insertion and removal of bread. The toaster is made of **stainless steel**, characterized by high resistance to corrosion and environmental factors, maximum hygiene, and ease of cleaning.

Technical features:

- Designed for automatic toasting of bread slices
- Ideal for any type of hotel facility
- Toasting chamber dimensions: 6 cm
- Extra-long slice loading area capable of accommodating up to 4 slices
- Rear toasted bread slice exit
- Maximum hourly production: 600 slices
- Low power consumption in relation to performance
