

Top-opening hotel safe h3474

Professional top-loading safe for hotels and B&Bs. Equipped with a 6-digit LED display, internal light and dual password (Master/User). Dimensions: W 400 x D 350 x H 130 mm.

The **top-opening (Top Loading) safe** represents the most ergonomic and modern solution for security in hotel rooms and high-level hospitality facilities. Thanks to the **upward opening** system, this model solves the operational accessibility problem typical of front-opening safes, allowing installation inside drawers, desk bases, or low wardrobe compartments. Guests can view and retrieve their belongings from above with extreme convenience.

The device is equipped with a high-visibility **6-digit LED display** and an **internal LED light** that activates automatically upon opening, ensuring a perfect view of the contents even in poorly lit environments. Security management is entrusted to a dual password system (**Master and User**), which ensures the facility management the possibility to intervene in case of emergency. With a reduced thickness of only 13 cm, it integrates perfectly into the furniture without sacrificing robustness, guaranteed by a weight of 12 kg and an anthracite-colored steel structure.

Technical characteristics

- **External dimensions:** W 400 x D 350 x H 130 mm
- **Internal dimensions:** W 390 x D 340 x H 75 mm
- **Opening type:** Top Loading (upward opening)
