

Double-sided advertising totem h140215

Display totem consisting of two reading panels in transparent polycarbonate. Useful posting space (single panel): W85 x H170 cm

Double-sided totem for public and advertising postings in galvanized steel sheet with a modern and current design. **Made in Italy** product.

The basic finish of this product is brilliant aluminum color, however, it is possible to request a different finish, choosing from the available RAL colors.

Structure:

- internal frame made of galvanized steel rectangular tube mm. 30 x 10 x 1.5;
- sides made of galvanized steel sheet thickness 30 / 10;
- calendered and laser-cut shaped top, in galvanized sheet thickness 40 / 10;
- posting surface obtained from panels made of galvanized sheet thickness 12 / 10;
- reading sides made of transparent compact polycarbonate, **unbreakable, UV-protected** and particularly suitable for outdoors, thickness 3 mm. The display of advertising media is made possible by removing the glazing beads that lock the transparent compact polycarbonate sheet;
- base in galvanized sheet thickness 30 / 10 with holes for possible fixing to the ground; the base is equipped with feet that prevent direct contact of the structure with the ground.

Fixing:

- base equipped with holes for anchoring to the ground by means of anchor bolts and expansion plugs.

Technical features:

- Dimensions: W90 x D60 x H232 cm
- Useful posting space (single panel): width 85 cm - height 170 cm
