

Toxic waste container-h32626

T/F toxic waste collection container with anti-intrusion lid and metal base. Capacity 105 lt.

The container for the collection of medicines is highly **impact and weather resistant** as it is made of polyethylene using the special rotational molding technique.

It is a truncated-cone container with a metal base, with a thickness of 5 mm. The container is 80 cm high with a lower base diameter of 37 cm and an upper base diameter of 44 cm.

On the lid, made of white methacrylate ABS with a rounded circular shape, there is an **anti-intrusion door**, measuring 19x19 H.20 cm.

It can be emptied with a bag or by means of a removable internal container, also made of plastic.

Technical features:

- Container capacity approx. 105 lt
- Height from the ground approx. 91 cm
- Lid dimensions approx. 48 cm
- Anti-intrusion lid dimensions 19x19 depth 20 cm
- Max lid depth approx. 56 cm
- Metal base size 49x45 thickness 5 mm
- Total weight approx. 14 kg
