

Tractor spring rider h521_50

Individual spring rider with a tractor-shaped structure. Dimensions: W. 84 x D. 76 x H. 102 cm. Safety area: 2.71 x 2.84 m.

The **h521_50 spring rider** is a safe and fun play proposal for toddlers, designed for public play areas. Its **tractor shape** stimulates children's fantasy and imagination, while offering a physical activity that promotes the development of balance, strength, and coordination.

The **structure is made of 15 mm high-density polyethylene (HDPE)**, a material resistant to weather, UV rays, and wear, designed to ensure durability and safety even in outdoor environments. The **junction plates and hardware** are made of **galvanized steel** for long-lasting performance, while all screws are **protected by colored plastic caps** to prevent direct contact and protect children from potential injuries.

The equipment is **compliant with the UNE EN1176 standard**, designed for intensive use in public parks, and is suitable for children **from 1 to 12 years old**, making it extremely versatile and inclusive.

Bring joy and movement to public play areas with the **h521_50 spring rider**: a fun, safe, and certified tractor for children from 12 months.

Technical features:

- **Type:** individual spring rider
- **Shape:** tractor
- **Recommended age:** 1 – 12 years

- **Can be installed in public areas:** certified according to European standard EN1176.

FAQ:

1. From what age can the spring rider be used?

The game is approved for children from 1 year to 12 years old.

2. Can the equipment be installed in a public playground?

Yes, it is certified according to the UNE EN1176 standard, therefore suitable for public installations.

3. Is the material weather-resistant?

Yes, high-density polyethylene and galvanized steel guarantee high durability outdoors.

4. How many children can use it at the same time?

As an individual game, it is designed for one child at a time.

5. What does the safety area include?

The safety area of 2710 x 2840 mm is the recommended space around the equipment to ensure safe use.

Short buying guide:

The **h521_50** spring rider is an ideal solution for designers, municipalities, and green area managers who wish to install safe and durable play equipment for children of various ages. The **tractor shape**, the use of **certified and resistant materials**, and its **adaptability to European standards** make it perfect for ensuring a safe and engaging play experience.
