

Traffic cone for warehouses and parking lots h503_41

Yellow traffic cone h503_41 in durable PVC (H 320 mm). Daylight fluorescent, stackable and anti-tip for logistics areas.

The **traffic cone for warehouses and parking lots h503_41** is a signaling device made of durable PVC, designed for the rapid and temporary delimitation of work areas and danger zones. Designed for logistics operators, facility managers and municipal service workers, it solves the need to channel traffic flows and signal sudden obstacles while ensuring good stability and resistance to tipping. Its yellow structure, fluorescent in daylight, ensures visible orientation and versatile use, allowing for immediate installation and easy handling within warehouses, parking lots, construction sites and public events.

Technical features

- **Material:** Plastic (durable PVC)
- **Color:** Yellow (daylight fluorescent)
- **Overall dimensions (L x W x H):** 227 × 227 × 320 mm
- **Height:** 320 mm
- **Weight:** 0.5 kg
- **Stability:** High resistance to tipping
- **Storage:** Stackable structure
