

Traffic cone with red and white tape h972_125

Professional PVC/ABS traffic cone, height 85 cm, ballastable base and 2-meter retractable belt with integrated anti-panic system.

The **h972_125 traffic cone** is a professional system designed for temporary demarcation and signaling in high-operability contexts. Thanks to its height of 850 mm and its **PVC and ABS structure**, the device ensures superior visibility and high mechanical resistance, meeting safety needs in construction sites, industrial areas, and logistical hubs. The system integrates a mobile physical barrier that allows for the containment of danger zones without the use of fixed supports or bulky chains.

Technical features

- **Height:** 850 mm
- **Base dimensions:** 550 x 550 mm
- **Frame materials:** High-resistance PVC and ABS
- **Strap material:** Durable polyester
- **Cone color:** High-visibility orange
- **Belt:** Length 2 meters, width 50 mm, Red/White bicolour
- **Weight:** 5.85 kg (empty)
- **Stability:** Ballastable base with water or sand
- **Use:** Indoor and outdoor, with waterproof housing
- **Mechanisms:** Retractable system with anti-panic technology
- **Modularity:** Integrated roller for attaching up to 3 simultaneous belts
- **Predispositions:** Upper threaded hole for installing information signage
