

Traffic cone with strap H 85 cm h972_126

Traffic cone h972_126 in PVC/ABS with 4m retractable strap "No Entry". Ballastable base and integrated panic safety system. The **cone with strap h972_126** is a professional solution designed for the quick and safe delimitation of hazardous areas. Ideal for **construction sites, maintenance areas and public event management**, this system solves the need for immediate signaling that is both stable and clearly readable even from a distance. The combination of a physical barrier (the strap) and high-visibility chromatic signaling makes it indispensable for injury prevention in complex operational contexts.

The structure is made of a mix of **PVC and ABS**, materials chosen for their impact resilience and ability to withstand prolonged exposure to atmospheric agents. The system is equipped with an **integrated retractable mechanism** with braking function and **panic device**, which guarantees the automatic release of the strap in case of sudden pressure, ensuring maximum safety for operators and passers-by.

Technical characteristics

- **Total height:** 850 mm
- **Base dimensions:** 550 x 550 mm
- **Structure material:** High-resistance PVC / ABS
- **Strap material:** High-density polyester
- **Strap length:** 4 meters
- **Strap width:** 50 mm
- **Cone color:** High-visibility orange
- **Strap message:** "NO ENTRY" red on grey background
- **Total weight (empty):** 5.95 kg
- **Ballastable base:** Designed for water or sand filling
- **Safety system:** Braking mechanism and panic release
- **Modularity:** Integrated roller to support up to 3 straps
- **Customization:** Top threaded hole for mounting information panels
- **Protection degree:** Waterproof casing for outdoor use
