

Crowd control barrier L.250 cm h109158

Hot-dip galvanized steel crowd control barrier. Dimensions: L. 250 x h. 110 cm. Tubular: D. 38 mm.

The road barrier is used to delimit areas closed to traffic for events, storage areas and construction sites.

The barrier is made of **hot-dip galvanized steel** and guarantees stability and solidity.

The barrier consists of a perimeter frame in tubular steel Ø 38x1.2 and vertical profiles in Ø 8 mm drawn steel rod welded to the frame at a distance of 12 cm from each other.

The barriers are linkable to each other by means of lateral rod appendages d.10 mm on one side, and 30x3 mm shaped flat hooks on the opposite side.

The product is entirely hot-dip galvanized according to UNI standards.

Technical features:

- Material: Galvanized steel
- Width: 250 cm
- Height: 110 cm
- Weight: 15.5 Kg
- Tubular: D. 38 mm
- Without reflector
