

Galvanized pedestrian barrier h19135

Galvanized and powder-coated barrier. Equipped with upright extensions for in-ground installation. Micaceous grey colour.

Pedestrian barrier with linear and simple shapes capable of creating a perfect harmony between design and safety. The **h19135 pedestrian barrier** delimits the environments of our daily outdoor life, designing spaces in an orderly and rational way and making them more protected and usable. Barrier with an inverted U-shaped outer profile and crossbar; the entire structure is galvanized and powder-coated.

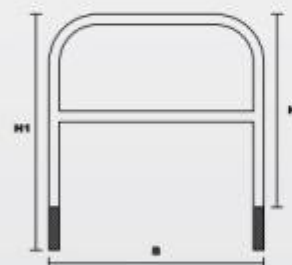

As standard, the barrier is supplied with the **extension of the side uprights** for in-ground installation by pouring a portion of the same directly on site.
