

Road barrier W.120 cm h109166

Linkable barrier in hot-dip galvanized steel. Dimensions: W. 120 x 110 cm. Steel tubular Ø 38 cm.

The road barrier is used to delimit areas closed to traffic for events, depots and construction sites.

The barrier is made of **hot-dip galvanized steel** and guarantees stability and solidity.

The barrier consists of a perimeter frame in Ø 38x1.2 steel tubular and vertical profiles in Ø 8 mm drawn steel rod welded to the frame at a distance of 12 cm from each other.

The barriers are linkable to each other by means of side appendages in d.10 mm rod on one side, and shaped flat hooks 30x3 mm on the opposite side.

The product is entirely hot-dip galvanized **according to UNI standards**.

Technical features:

- Material: Galvanized steel
- Width: 120 cm
- Height: 110 cm
- Weight: 10 Kg
- Tubular: D. 38 mm
- Without reflector
