

Transfer board h136_92

Transfer board maximum capacity 150 kg.

Transfer board designed to be effectively portable, in fact it has a **thickness of only 4 millimeters** and a **handle hole for the hand**. The board has a bright color and a **double notch** for greater stability and to ensure maximum safety during the transfer. The composite fiber ensures **high resistance** and allows to avoid the harmful surface chipping that occurs over time with other materials. The high smoothness on the upper part allows for easy sliding, enabling the transfer. The smoothness on the lower part allows users with little hand strength to remove it from under their legs once the transfer is completed. **CE certified, class I medical device, produced in Italy.**

Technical features:

- Dimensions: L.77xW.32.5 cm
- Thickness: 4 mm
- Maximum capacity: 150 kg
- Material: synthetic fiber
- CE certified
- Class I medical device
- Made in Italy
