

Transfer board with grooves h136_96

Transfer board with double groove and non-slip bottom. Maximum capacity 135 kg

Transfer board with **double handle** for the hands and rectangular shape. It is equipped with a **double groove** that allows the board to **adapt to the shape of the wheelchair**, providing the board with a slight contouring that at the same time acts as a guard rail to make the transfer even safer. The upper surface is smooth to **facilitate movement** through the sliding of the user, the lower base of the board features **two strips in non-slip material** that favor the **grip** between the aid and the support point of the wheelchair and the sofa, bed, toilet or car seat, thus stabilizing the aid. **Lightweight** and **easily portable** thanks also to the **6 mm thickness**.

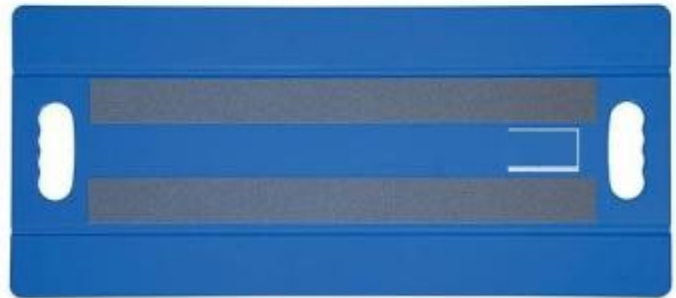

Technical features:

- Rectangular shape
- Double handle
- Double groove
- Non-slip bottom
- Dimensions: L.73xW.33 cm
- Thickness: 6 mm
- Maximum capacity: 135 kg
